## Education

**B.Tech, Motilal Nehru National Institute of Technology Allahabad** *2022–2026*
Computer Science and Engineering | CGPA: 7.55

**Class 12th, SDVM Public School, Gwalior,MP** *2021*
Percentage: 82%

**Class 10th, Vidya Niket School, Gwalior,MP** *2019*
Percentage: 90.6%

## Experience

**Grid Dynamics** *Jan 2026 – Jun 2026*
*Software Engineering Intern*

- Engineered backend features for **TalentGrid**, an AI-native workforce intelligence platform, leveraging Java, Spring Boot, React.js, Apache Kafka, PostgreSQL, and a microservices architecture.
- Designed and implemented RESTful APIs for the **Interview** and **Scorecard** modules using Spring Boot, Spring MVC, Spring Data JPA, and DTO-based layered architecture (Controller–Service–Repository).
- Collaborated with a **6-team cross-functional engineering organization** to develop backend microservices for the Talent Acquisition Engine, contributing to a shared-database enterprise platform.
- Gained hands-on experience with scalable backend development, REST APIs, SDLC, Agile methodologies, Maven, testing, and distributed systems through the Grid Dynamics IEP program.

## Projects

**CodeForge – Real-time Collaborative Code Editor** *Link*

- Collaborative code editor for real-time coding, voice chat, and competitive programming.
- Built real-time sync (Socket.IO), voice chat (WebRTC), and JWT-authenticated rooms using Node.js & Express.js backend.
- Created 5+ competitive programming features including real-time code execution (Judge0), code battles, leaderboards.
- Designed a responsive CodeMirror-based UI with 100% responsiveness using React, Tailwind CSS, ShadCN, and managed state efficiently with React Query.

**Official Website for 52nd IMMUNOCON 2025**

- Built the web platform for 52nd international conference of Indian immunology society held at MNNIT Allahabad.
- Constructed 3 major modules (registration, abstract submission, event info) for Immunocon 2025 conference platform expected to serve 500+ users with a Node.js Express.js backend.
- Delivered a responsive and accessible UI using Tailwind CSS and integrated React Query for efficient client-side data handling.
- Followed an agile, iterative development process with regular sprint updates, incorporating post-deployment feedback to enhance features and usability.

## Technical Skills

**Languages**: Java, Javascript
**Web Technologies**: HTML, CSS, REST APIs, WebSockets, JSON
**Developer Tools**: GitHub, VS Code, Postman, Maven, JUnit
**Frameworks/Libraries**: Springboot, Spring MVC, Spring Data JPA, JDBC, React, Express.js, Node.js, Tailwind CSS
**Databases**: MongoDB, MySQL, PostgreSQL
**Other**: Socket.IO, JWT, React Query
**Areas of Interest**: Full Stack Web Development, Data Structures and Algorithms, Object-Oriented Programming (OOP), Database management system, Operating System, AI/ML

## Positions of Responsibility

Coordinator, Astro Club MNNIT | Web Team, Institute Innovation Council (IIC), MNNIT

## Certifications & Achievements

- **Microsoft Certified: Azure Fundamentals (AZ-900)** – Foundational certification in Microsoft Azure cloud services, security, pricing, and governance.
- **Uhack 2.0 Hackathon (Best UI/UX Winner):** Won Best UI/UX for developing a health-focused website with an AI chatbot using MERN Stack, RASA, NLTK, and Python.
- **Codeforge (Botrush) – First Runner-up:** Developed an AI-powered disease diagnosis website using MERN Stack, RASA, NLTK, and symptom analysis APIs.
- **Webster (Codesangam) – Ranked 6th (Top 2nd Year Team):** Created a MERN-based task management web app with note-taking, reminders, to-do lists, Markdown support, and canvas integration.
- Solved **1000+ Data Structures & Algorithms** problems across LeetCode and GeeksforGeeks using Java.
